DO
THIS

```
$ git clone https://chromium.googlesource.com/chromium/tools/depot_tools.git
```

```
$ gclient config http://webrtc.googlecode.com
```

```
$ ./build/install-build-deps.sh
```

```
$ gclient sync --force
```

```
$ gclient runhooks --force
```

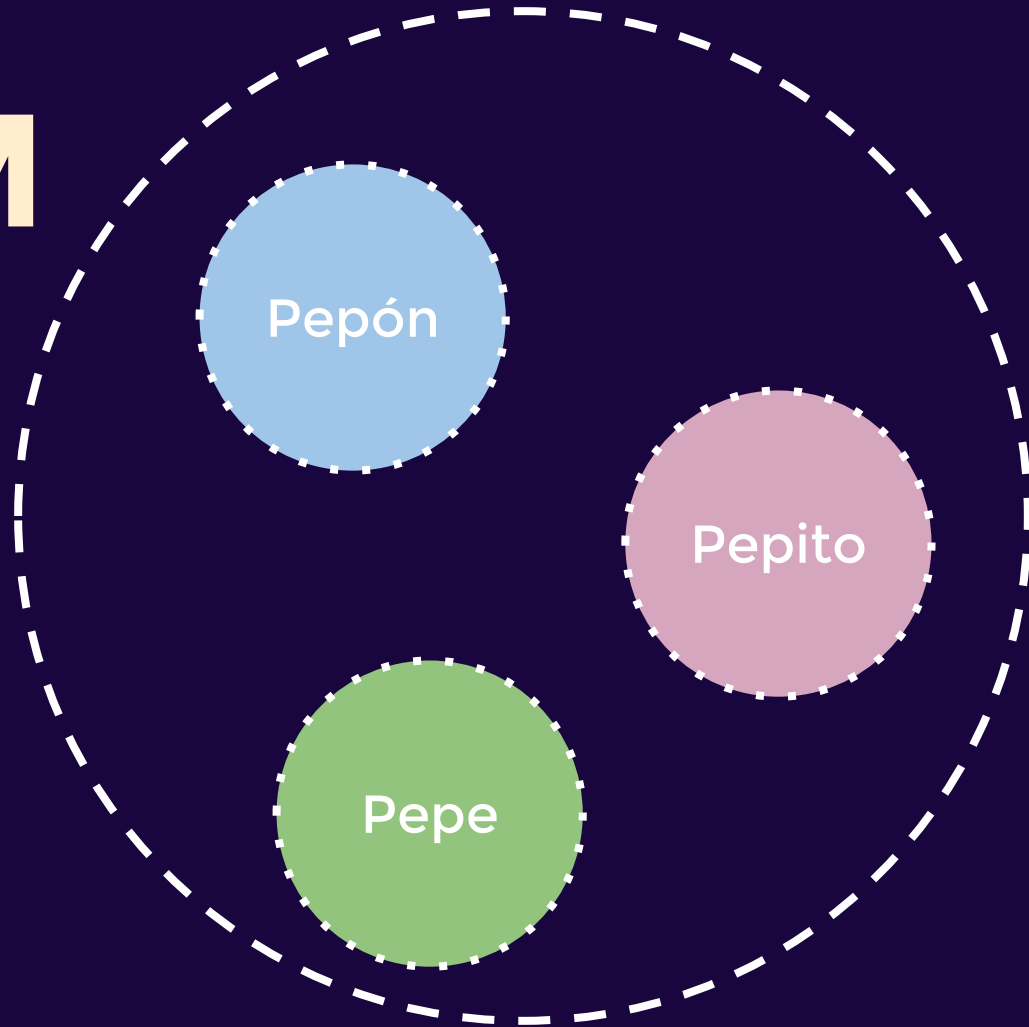

```
$ echo "target_os = ['android', 'unix']"
```

```
>> .gclient
```

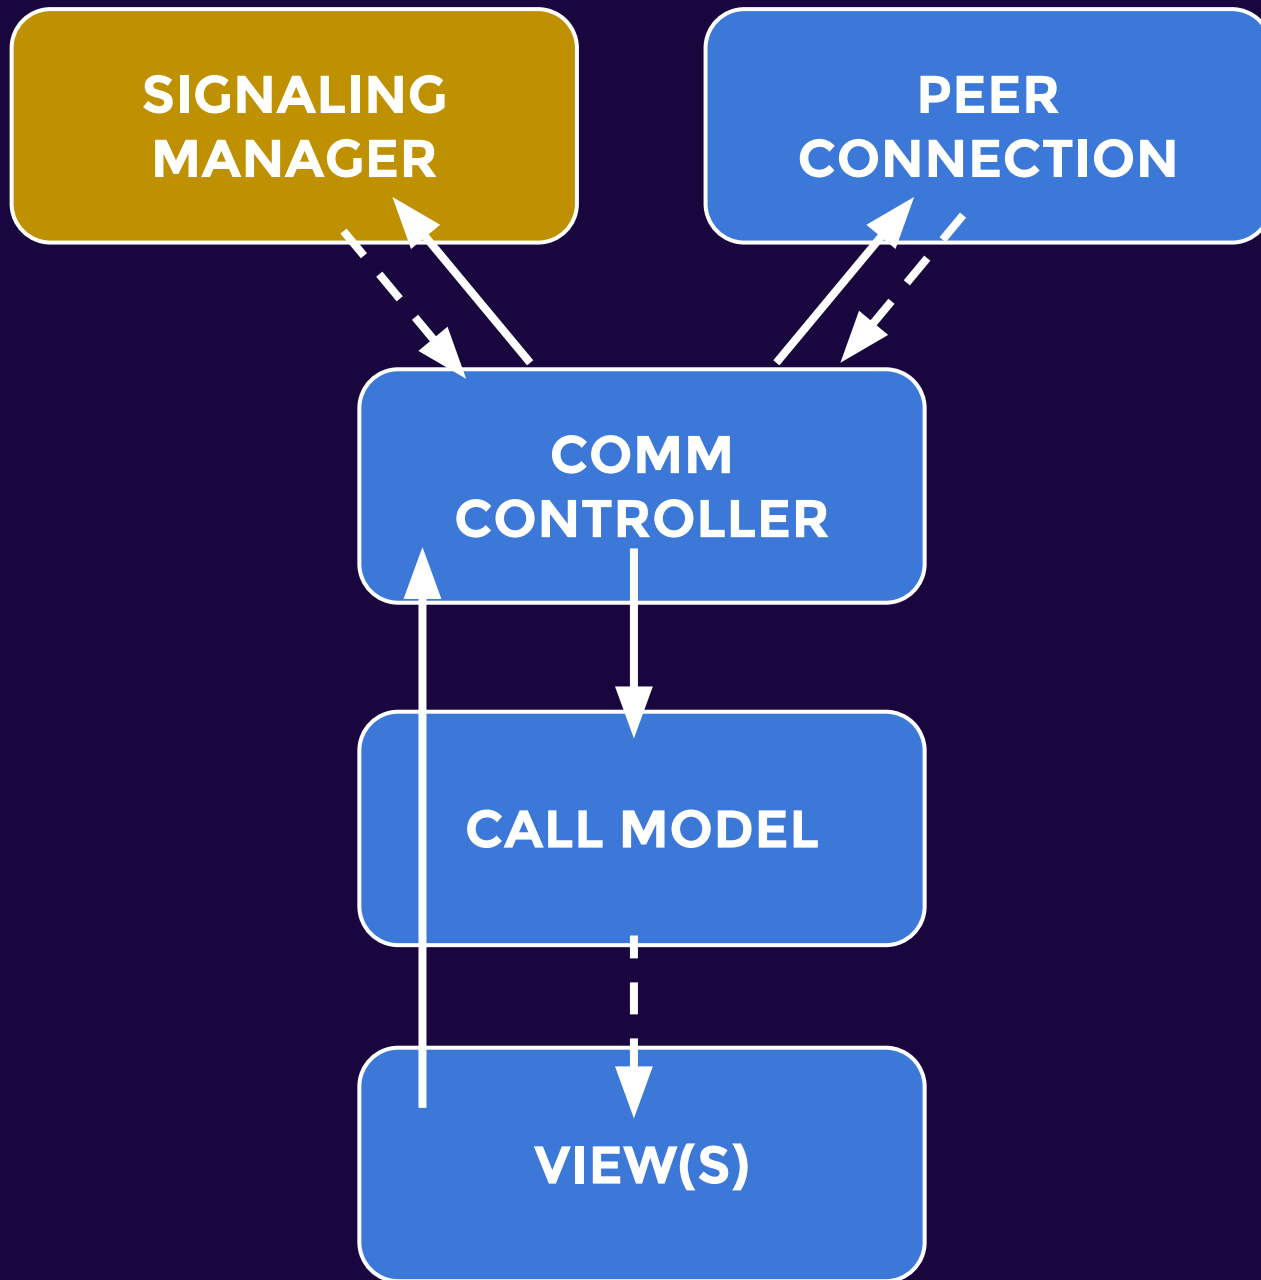

```
$ ...
```

```
$ exit
```
